

Engage People. Simply. Anywhere. With Kubi.

Kubi is the intuitive, affordable, next generation device designed to work with existing conference room and office technology, allowing everyone to make more engaging video calls.

For CEO to receptionists, from lobbies to conference rooms, Kubi has unique advantages over conventional video conferencing. Kubi lets people easily look around remotely with 300 degrees of pan and 90 degrees of tilt to see and interact with colleagues, customers and partners, through remote robotic control during a video call. The motion of Kubi combined with high quality video

provides increased telepresence, meaning greater engagement on calls. Kubi is controlled by intuitive apps that run on Apple and Android tablets. Kubi comes with a removable base for use on tabletops and is designed with a universal camera mount to easily attach to tripods and carts. Kubi integrates with other digital services through open APIs, video apps like Vidyio and Zoom,

Business Use Cases

- Video Conferencing
- Remote Working
- Virtual Receptionist
- Customer Service
- Expert Training
- Retail Assistance
- Security Desks
- Board Observation
- Multi-location Work
- Sales Teams
- Always-on Video Portals

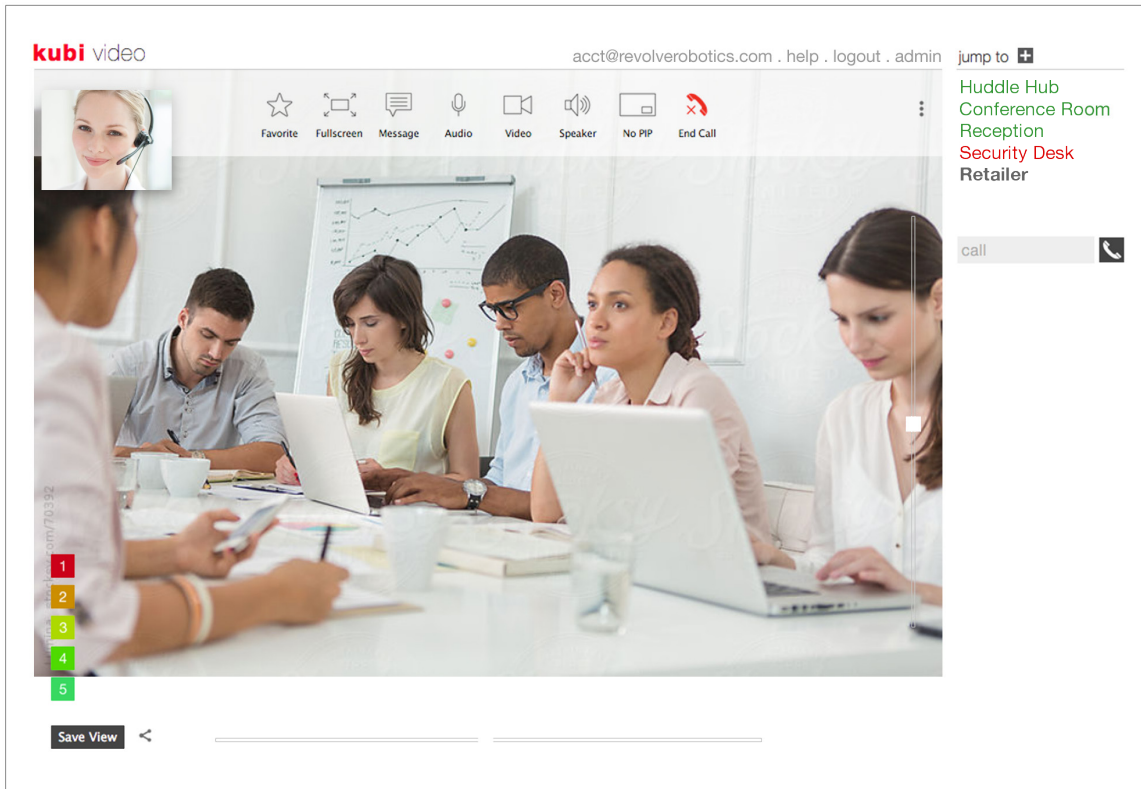

and can be connected to audio and video systems for a customizable AV solution.

Because Kubi is so affordable, units can be installed in many locations. People can simply “teleport” from conference room to huddle room, or one geographic location to another without moving heavy video conferencing equipment.
