

# How to set up **Kubi** Control

**Kubi** meaning 'neck' in Japanese, is a portable robot that makes video conferencing more engaging by giving remote participants the power to pan, tilt, look around and interact during video calls.

The **Kubi** App connects iOS or Android tablets using Bluetooth 4.0 to enable remote controls from a web browser. The Kubi App runs in the background and can work with Facetime, Skype, Hangouts, Zoom or any video app.

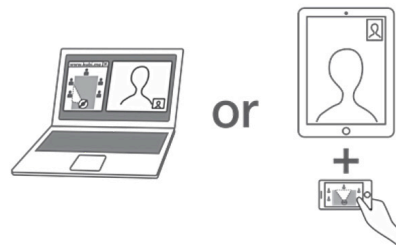

## Connecting Your Tablet:

1. Attach the base to KUBI using the D-ring tripod Screw
2. Press the button on KUBI to power it on
3. Make sure the tablet Wi-Fi or 4G is connected and Bluetooth is enabled
4. Launch the KUBI App (can be downloaded from iOS App Store or Play Store)
5. The KUBI App will automatically connect when launched
6. Click the 'Invite' button
7. You will be prompted to email or copy the link to a remote participant\*\*
8. Mount the tablet on the KUBI
9. Connect your video call as usual

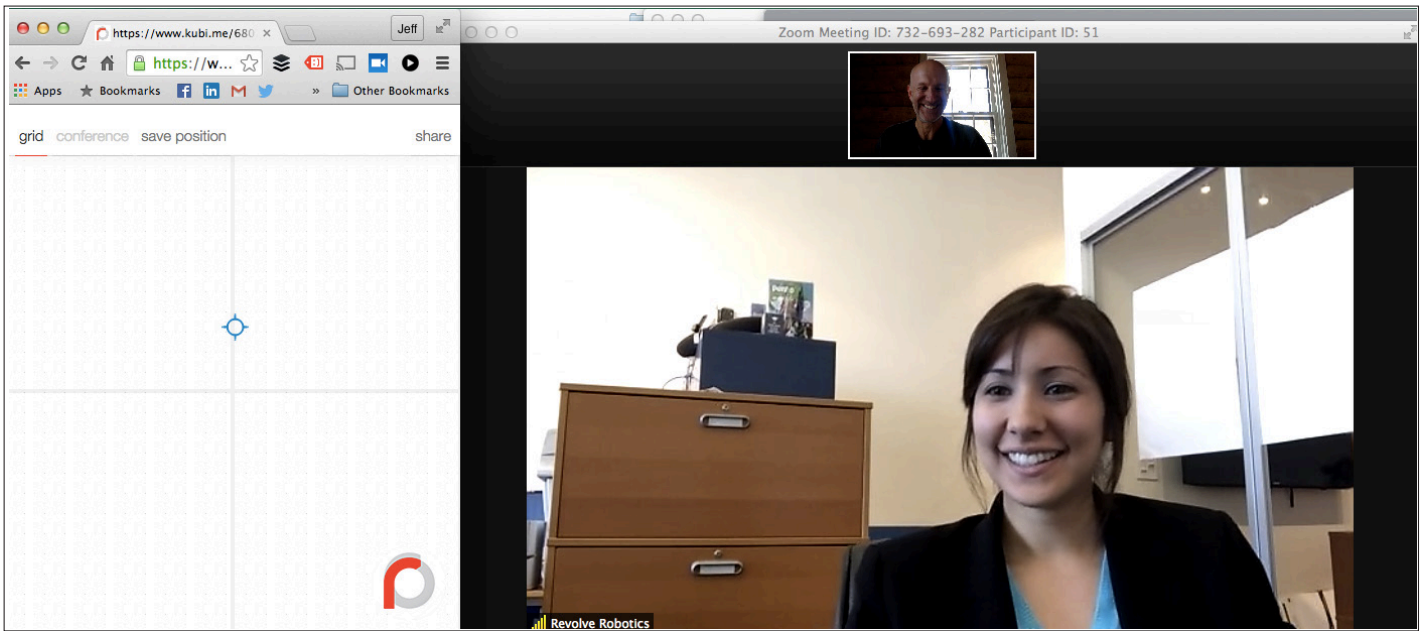

\*\* Email invite may not work in some operating system versions. If that is the case, copy the link and send it to the participant in an email.

## Controlling Kubi Remotely:

1. Use either a laptop with 2 windows (left) or a tablet with phone (right)

2. Open the [www.kubi.me/<KUBI\\_ID>](http://www.kubi.me/<KUBI_ID>) URL link from the invitation email in a web browser (or on a separate smart phone if you are using a tablet)
3. Connect your video call in a separate window.
4. Control KUBI by clicking or tapping on the control grid in the control browser window (or on a separate smart phone if you are using a tablet).

*Control Kubi in one window and video in another.*

*Kubi is compatible with Apple and Android Tablets*

*Universal camera mount means installation is simple*

- Works with all Video Services
- Connects Tablet with Bluetooth 4.0
- 4 hr battery, USB or AC powered
- 300° Pan, +/- 45° Tilt
- 6.4cm W x 6.4cm L and 30cm height (w/o base).
- Unit Weight 370g, 755g w/ base
- 1 year warranty
